

JE Information System

- Access to general information, and user list, published papers and thesis
- Access to internal documents (such as field book, research and paper proposals, presentation)
- Access to all metadata
- Access to Public Data (data download will be stored, owners and PIs are informed, need to fill in a questionnaire during download)
- Access to non-public data after request to the owners (subproject PIs are informed). Owners have to agree on data use.

- Access to general information, user list, published papers and thesis
- No access to internal documents
- Access to all metadata excluding method description
- Access to Public Data (Data download will be stored, owners and P.I. are informed, need to fill in a questionnaire during download)
- Access to non-public data after request to the owners (all PIs of the research unit are informed). Owners and all PIs represented by the speaker of the research unit have to agree on data use. Permission to access data is granted by data manager. External user has to collaborate with a PI of the research unit on the project or become an internal member (needs approval by all PIs).

Owners and PIs are informed about data download.

Owners and PIs are informed about data download.

Proposals and manuscripts should be circulated among the JE members (10-14 days for comments)

- Paper Proposal circulation via JE system among internal members
- Manuscript circulation among internal members
- Upload final publication to the system available to all (internal and external) members
